Subject: Microsoft Settlement

I have read through the proposed settlement with Microsoft and felt it necessary to notify you of my feelings. I urge the DOJ to abandon the proposed settlement in its current form.

The proposed settlement looks to me to be the same type of 'slap on the wrist' that Microsoft received in the last anti-trust finding against them. It does not truly address Microsoft's anti-competitive behavior nor does it offer any incentive for Microsoft to change its behavior in the future.

Thank-you for your time.
